

Steady Stand Springs

Belleville Washer Stack Replacement

Genuinely HYSON Solutions

Designed to improve mill safety and productivity with controllable and consistent force.

LOWER MAINTENANCE - RELIABLE - EASY INSTALLATION

Next Generation adjustable drop-in shock absorption springs

Next-generation shock absorption for long products, **HYSON Metal Forming Solutions'** Steady Stand Springs (S3) provide an ideal replacement for Belleville Washer applications. As a one-piece, **self-contained solution** providing reliable force, the S3 eliminates fatigue traditionally experienced with spring washer stacks. Additionally, S3 **improve beam quality and processes** with dimensional consistency and repeatable contact force at all points.

These **quick change cylinders** are engineered with robust, mill-duty components including bore seals, to provide longer lifespan and reduce maintenance costs.

Easily Installed and Fully Rebuildable!
